TRANS-SPACE
MANAGING SPACE WITH OPERABLE WALLS AND DOORS

400 Slider Series

The 400 Slide Series suits modern architecture prominent in many offices, education and commercial spaces.

A moveable wall solution for maximum visual transparency, ease of use and better acoustic separation.

Main features are:

- No bottom tracks
- Natural light utilised
- Aluminium frame
- Creates a multipurpose space
- Single, double or triple overtaking

Surface Sliders

Our sliders have various options that can accommodate many spacial and interior needs.

The maximum width for Single panels is 1200mm which can be combined to make bigger panels.

Flexible Partitions

Available in various panel configuration that suits your needs: face slide, double overtaking, cavity or triple.

Consult with Trans-space Industries for more information on specific configurations or other technical queries.
